By Profession, Senior Staff Frontend Engineer with around 19 years of experience, I am leading frontend initiatives and supporting our main application from development to post deployment. I specialize in ReactJS, NextJS and micro-frontend architectures. I support the global ecommerce platform at BHN giftcards.com, implementing TDD-based development, CI/CD pipelines and responsive UI components. I Mentor junior developers and champion code quality to deliver scalable web applications.

Current Experience @ BHN (Blackhawk Networks), from Oct`22 to present

As Senior Staff Engineer, Frontend => Principal Engineer / Architect, Frontend

- I am a github co-pilot AI practioner and spec driven development
- I am the architect and lead the global multi-tenant frontend architecture for high-traffic e-commerce platform (giftcards.com), driving system availability using AEM Cloud, scale, and performance
- I drive the platform migration efforts which saves lot of cost to department eg. Get rid of AEM licensing by moving into NextJS platform which would save \$0.6 million per year
- I engineered micro-frontend architecture for giftcards.com, cutting deployment times by approx 40%
- I redesigned PDP for giftcards.com by view fee transparency which improbed CWV to green zone, increased conversion by 18% and reduced customer queries by 20% saving lot of time to support desk
- I improve checkout process which would increase conversion metric and transparency to customers
- I help set engineering standards, technical roadmapping for D2C, and mentoring Senior/Staff engineers
- I have successfully dealt with many enterprise apps while working in small/big organizations
- I standardize TDD & spec driven frontend development mainly ReactJS, NextJS, HTML, CSS, Javascript
- I design and implement enterprise-scale web architectures using React, Next.js, Micro-frontends, and Monorepos, seamlessly integrating CMS solutions like and Payload CMS and Adobe Experience Manager (AEM)
- I establish automated CI/CD pipelines (GitHub Actions, SonarQube, Snyk) to enforce security scanning, automated testing attachments in pipeline, and zero-downtime releases
- I practice **client-server + MonoRepo + REST + Monolithic + Microservice + Micro frontend architectures**
- I reduced AEM based frontend build time from 5mins to 2min by using eslint & snapshot caching
- I contribute to engineering metrics, working groups, architecture design and leadership discussions
- I govern code quality using sonarqube, git hooks, snyk scans and constant review cycle
- My apps follow patterns e.g OAuth2.0 & JWT tokens
- I make applications safe from **XSS, CSRF**, and vulnerabilities and error free by constant review and iteration
- I **Code. Collaborate. Build. Change. Incident. Release. Triage**
- I help in **recruiting**, growing and enabling a team
- I am a **code reviewer, mentor**, and face to dev team
- Lead end-to-end operational lifecycle management—driving architecture design, release strategies, incidents, triage, and SLA metrics across teams
- I use **JIRA | Rally | Leankit | Trello** for agility, bug tracking and backlog grooming

As Senior Staff Frontend @ Blackhawk Network (BHN)

Oct2022 – present

giftcards.com is fintech ecommerce multi-tenant platform for prepaid giftcards across North America and Europe, managing dynamic storefronts for 450+ enterprise merchant brands and handling high-volume e-commerce transactions (\$2B+ processed volume). I Spearheaded the integration of AEM and payload CMS with Next.js/React micro-frontends, establishing standard component libraries that reduced time-to-market for regional promo campaigns by 40% while preserving sub-second page loads.
