By Profession, Senior Staff Frontend Engineer with around 19 years of experience, I am leading frontend initiatives and supporting our main application from development to post deployment. I specialize in ReactJS, NextJS and micro-frontend architectures. I support the global ecommerce platform at BHN giftcards.com, implementing TDD-based development, CI/CD pipelines and responsive UI components. I Mentor junior developers and champion code quality to deliver scalable web applications.

Latest Experience @ BHN (Blackhawk Networks), from Oct`22 to present

As Senior Staff Engineer, Frontend => [Principal Engineer / Architect, Frontend](#)

- o I am a github co-pilot AI practioner and spec driven development
- o I am the architect and lead the global multi-tenant frontend architecture for high-traffic e-commerce platform (giftcards.com), driving system availability using AEM Cloud, scale, and performance
- o I drive the platform migration efforts which saves lot of cost to department eg. Get rid of AEM licensing by moving over to **NextJS & PayloadCMS** platform which would save **\$1.5 million** per year
- o I engineered micro-frontend architecture for giftcards.com, reusable patterns across apps, cutting development times by 60% by AI adoption and deployment times by approx 40% by improving build and CI/CD handshakes
- o I redesigned PDP for giftcards.com by view fee transparency which improved **CWV** to green zone, increased conversion by **18%** and reduced customer queries by **20%** saving lot of time to support desk
- o I improve checkout process which would increase conversion metric and transparency to customers
- o I help set engineering standards, technical roadmap for D2C, and mentoring Senior/Staff engineers
- o I have successfully dealt with many enterprise apps while working in small/big organizations
- o I standardize TDD & spec driven frontend development mainly ReactJS, NextJS, HTML, CSS, Javascript
- o I design and implement enterprise-scale web architectures using React, Next.js, Micro-frontends, and Monorepos, seamlessly integrating CMS solutions like and Payload CMS and Adobe Experience Manager (AEM)
- o I establish automated CI/CD pipelines (GitHub Actions, SonarQube, Snyk) to enforce security scanning, automated testing attachments in pipeline, and zero-downtime releases
- o I practice **client-server + MonoRepo + REST + Monolithic + Microservice + Micro frontend architectures**
- o I reduced frontend build time **from 5+mins to 0.5min** by using **eslint & snapshot caching**
- o I contribute to engineering metrics, working groups, architecture design and leadership discussions
- o I govern code quality using **sonarqube, git hooks, snyk** scans and constant review cycle
- o My apps follow auth patterns e.g OAuth2.0 & JWT tokens
- o I make applications safe from **XSS, CSRF**, and vulnerabilities and error free by constant review and iteration
- o I **Code. Collaborate. Build. Change. Incident. Release. Triage**
- o I help in **recruiting**, growing and enabling a team
- o I am a **code reviewer, mentor**, and face to dev team
- o Lead end-to-end operational lifecycle management—driving architecture design, release strategies, incidents, triage, and SLA metrics across teams
- o I am co-developer in **BHN design system** and help onboarding and cross team development
- o I use **JIRA | Rally | Leankit | Trello** for agility, bug tracking and backlog grooming

As Senior Staff Frontend @ Blackhawk Network (BHN)

Oct2022 – present

giftcards.com is fintech ecommerce multi-tenant platform for prepaid giftcards across North America and Europe, managing dynamic storefronts for 450+ enterprise merchant brands and handling high-volume e-commerce transactions (\$2B+ processed volume). I Spearheaded the integration of AEM and payload CMS with Next.js/React micro-frontends, establishing standard component libraries that reduced time-to-market for regional promo campaigns by 40% while preserving sub-second page loads.
